

Kentucky's Economic Competitiveness

A Call for Modernization of the State's Fiscal Policies

Kentucky and Surrounding States
Metropolitan and Micropolitan Counties 2003

by
Paul Coomes, Ph.D.
Professor of Economics, and
National City Research Fellow

and

Barry Kornstein
Senior Research Analyst

University of Louisville
December 2004

Acknowledgements

Funding for this study was provided by the Tri-County Economic Development Foundation in Northern Kentucky, the Lexington Urban-County Government, and Greater Louisville Inc. National City provided a grant for regional economic research that underpinned much of this research. Thanks to Danny Fore, Gary Toebben, Steve Higdon, and Julian Beard for their leadership. For the first time, Northern Kentucky, Lexington, and Louisville are working together to learn about and highlight the urban competitiveness issues so key to our state's prosperity.

We also wish to thank Margaret Maginnis for her help with the database construction and for the map of metropolitan and micropolitan areas. And we appreciate the assistance of many state officials who provided data and advice for this report.

CONTENTS
